PRELIMINARY PETITION FOR SPEED HUMPS

We the named residents or property owners on the below list do hereby support the installation of speed humps on 39th Ave S between Minnehaha Parkway and 49th St E.

We recognize the advantages of reduced speeds, but also the disadvantages, such as a potentially slower response time for emergency vehicles, and an increase in noise and vibration.

We recognize the City of Minneapolis will ~~have limited options and locations~~ install humps as per agreed upon attached plan. to meet traffic calming criteria and agree that all costs associated with the installation of such devices are paid for solely by private funds, i.e. from residents, property owners, or neighborhood associations. As such it is the responsibility of the neighborhood to gather and present the funds to the city before any installation of such devices can take place. We understand that the cost of two speed humps, including installation and signage, is approximately $7,000, which will be divided equally by the six properties on the 4800 block of 39th Avenue South if no other private funding sources are used.

This is a preliminary petition to gauge neighborhood support for speed humps and by signing your name below you are indicating that you are in support of speed humps.
