- Youth
- Seniors
- People w/Disabilities
- English Language Learners

Businesses

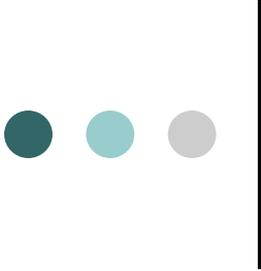

- Small
- Underutilized
- Minority
- Women

Travelers

- Visitors
- Newcomers
- Students
- Commuters

Priority Principles

- **Have computer and Internet access:** People need affordable and reliable computers and broadband Internet access.
- **Be digitally literate:** Beyond having access to technology, people need to understand digital technologies and how to use them effectively to achieve their educational, economic, civic, and social goals.
- **Embrace digital society:** People must see value to adopt a digital lifestyle. The City is stronger, the more its residents take advantage of computing and the vast sea of knowledge the Internet offers.
