The Lasalle Avenue Project

Volume 2 04.11.14

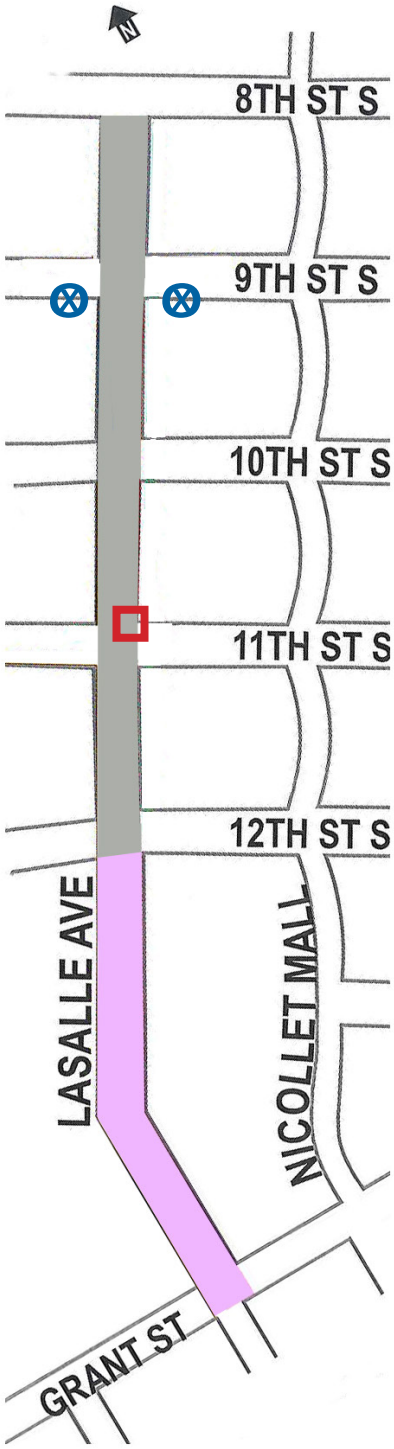
Lasalle Avenue from 8th Street to Grant Street

Mill and Overlay (2014)
Paving Reconstruction (2015)

CONSTRUCTION FOR THE WEEK OF APRIL 14-18

Minneapolis water installing valves. Lane closures on the south side of 9th Street.

Xcel rebuilding manhole lane closure on North side of 11th street and on East side of Lasalle Avenue.



Our goal in the management of this project is to schedule necessary work activities by the City and the private utility companies that need to replace and/or improve their underground facilities within the project limits in a way that will minimize the inconvenience caused by this work.

We will continue to provide you with the best information that we have regarding the scheduled work activity for this project each week.

When working underground not everything is predictable and unforeseen conditions and/or inclement weather will at times require adjustments to our planned schedule. We will advise you of significant changes in as timely a manner as possible.

We have also established a project information line where you can contact us about any specific problems or concerns that you may have. We will monitor this information line closely and will normally be able to respond to your concern the same day as received.

We will provide weekly updates of project activity each Friday with more specific information as plans are completed. We thank you in advance for your patience and cooperation.

We thank you for your patience and cooperation.
