

# Focus Area: Waste and Recycling

Estimated greenhouse gas emissions (GHG) and impact of Climate Action Plan goals and strategies:  
Waste and Recycling strategies impact, 2006-2025

## Waste and Recycling goals

1. Achieve a zero percent growth rate in the total waste stream from 2010 levels.
2. Recycle 50 percent of the waste stream (commercial and residential) in Minneapolis by 2025.
3. Increase organics collection to 15 percent of the waste stream by 2025.
4. Reduce the flow of wastewater from Minneapolis and support efforts to make wastewater treatment more energy efficient.
5. Increase awareness of the lifecycle impacts of products to address greenhouse gases occurring outside the community.

## Waste and Recycling strategy areas

1. Reducing waste
2. Increasing recycling
3. Increasing the composting of organics
4. Addressing product lifecycle impacts
5. Reducing wastewater treatment impacts
