

The proposed extension is: Minneapolis MSA Route 431, 28th Ave. S., Eastbound Ramp TH62 to 58th St. E. (0.07 miles shown in red). The extension of the existing route will complete a bus route connection on Minneapolis MSA route 431 on 28th Ave. S. from 58th St. E. to Trunk Highway 62 (Crosstown). The ADT for the segment directly north of this is 6,193 and would be used for the proposed segment until the next traffic count is done on this route. We currently have about .6 miles of undesignated mileage available.
