Background/Supporting Information:
Marge Magnuson Construction has a contract to remove and replace the damaged, concrete slabs and steel on the top of the Activated Carbon Tank in the Softening Plant at Fridley Water campus.
During demolition and removal, we discovered some additional unsuitable concrete and more damaged slabs. Marge Magnuson construction is using the same unit cost submitted during bid process to remove all damaged and replace it with good concrete slabs. This was not in the scope of their work and the change order is in the amount of $19,035.00.
