

# Bicycle safety starts with all of us

With summer in full swing, more and more people are taking to our streets and trails on bicycles.

## Ride predictably

When you bike, remember to follow traffic laws and ride predictably.

## Look for bikes

When you drive, remember to slow down and look for bicyclists, especially when turning.

## And did you know

Bicycling in Minneapolis is getting safer. As more people have started riding, bicycle crashes have not increased.

No matter how you get around,  
thank you for making  
our streets safer.
