Subject: MCC Fire and Preventative Maintenance: Selection Summary

MCC has exclusive Siemens fire alarm system that encompasses our fire panels, deluge release panel and PC-based network command center. A Siemens license is required to trouble-shoot, repair and program this proprietary software and equipment. Respective fire and preventative maintenance vendors have not acquired the Siemens license and certification to perform maintenance functions on Siemens fire alarm systems and hardware. Sub-contracting is prohibited for this service and a vendor that does not have a Siemens license would have to sub-contract out to Siemens for any maintenance and testing on our Siemens fire alarm systems and hardware. This option would increase our expenses, impact our maintenance support and delay response time in trouble-shooting and/or repairing our Siemens software and equipment.
