Background / Supporting Information:

Public Works and Regulatory Services have reviewed ordinances that pertain to boulevard ordinances. As a result, Public Works recommends ordinance changes to both clarify the kinds of vegetation allowed in a boulevard and allow the Department of Regulatory Services to enforce violations in the boulevard (Right-Of-Way) using the "safety" portion of the city code (i.e. vegetation that blocks traffic signs). Enforcement will focus on road and boulevard safety rather than on the types of vegetation grown.

Action amends Chapter 427.10 Boulevards:

- (b) clarifies the definition of a boulevard;

- (c) clarifies what types of vegetation are allowed in the boulevard and refers to the existing Code in sections 227.90 and 244.1580. Also, clarifies the boulevard planting of trees by referring to Chapter 10 of the Park and Recreation Board Code of Ordinances.
- (f) Specifically states that the City Engineer is designating that the Department of Regulatory Services shall enforce compliance or any violations in the boulevards in the same procedural manner provided in section 227.100.
