None

Supporting Information

The City has a Professional Services Agreement, Contract C-37156, with A+ Systems to provide power and DSL (Digital Subscriber Line) connectivity to the safety cameras in the

area around the Third and Fourth Police Precincts. The Minneapolis Police Department is the user of this contract which will expire August 31, 2014. The total contract value is \$50,000 and out of funds; therefore future payments cannot be made.

Information Technology (IT) is in the process of converting the DSL lines connected to the safety cameras in these areas to make use of the WiFi technology provided by USIW. After the conversion is complete, only one DSL line will be necessary in each of the precincts. The safety cameras in the Third Precinct area have been converted to WiFi. The conversion of the safety cameras in the Fourth Precinct is underway. No additional appropriation is required at this time.
