- Civil Rights Approval Approval Yes Date August 18, 2014

Financial Impact

- Action is within current department budget.

Community Impact

- City Goals: Great Places: Natural and built spaces work together and our environment is protected

Supporting Information

The City needs a registered professional electrical engineer to provide electrical and controls engineering services for two distinct electrical improvement projects at the Fridley Water Treatment Campus. The two projects are similar in scope, but are located in two different plants and reside under two different capital projects.

Sebesta, Inc. is familiar with both these projects and has proposed to provide electrical and controls engineering services on both improvement projects at a set hourly rate for a contract total of up to \$100,000.
