**Ward/Neighborhood/Address:**

Not Applicable

**Background/Analysis:**

SecuroNet enables private and public entities to join forces on a virtual safety network to prevent, reduce, and investigate crime. SecuroNet members can easily collaborate, share video data and utilize an arsenal of capabilities on a secure platform.

SecuroNet SafeLink: Enables the City of Minneapolis to easily know where cameras are located and quickly access information to address problems and solve crimes. It allows the community to securely share exterior security camera location data with law enforcement through an easy to use online portal. With SecuroNet's mapping function law enforcement and other members can communicate an incident in the vicinity of their camera, and if necessary, instantly request video footage and or photo's to one or more members to assist in the investigation of a crime.

SecuroNet VideoLink: Allows City of Minneapolis members to securely share real-time exterior camera feeds from their locations with police officers and other personnel, helping them to respond quickly to unfolding current events. The live camera feeds can be instantly pushed to any device, improving situational awareness for law enforcement and first responders.

SecuroNet ShareLink: Is a set of easy-to-use collaboration tools built into the SecuroNet Platform. It facilitates easy communication, data sharing and networking for SecuroNet members, creating a virtual community that is committed to creating a safe and secure environment for their customers, colleagues and the public.

**Financial Review:**

**No additional appropriation required, amount included in current budget.**
