Re: Donation of Fire Truck & Public & Life Safety Equipment to Bosaso

---

The average price for the last five Fire Trucks that have been sold was \$2824 with average net proceeds of \$1625 after fees. The Fire Truck to be donated to Bosaso, Somalia would also fall in this range and estimated value is \$2000.00.

The miscellaneous used public safety-crime lab items have little to no value. An internet search was done to determine value and the items ranged from \$97-\$420 brand new. Some of the items are now obsolete and couldn't be found online.

The rescue tools are very old with the cutter and spreader being 25-30 years old and the power head approximately 15 years old. A high estimate of the tools considering their age would be \$1000.00.

The 2005 Chevy Express Van has a Kelley Blue Book Value of \$4,200 and two were found on Craigslist for \$3900. It is estimated that net proceeds for this item at auction would be between \$1000-\$3000.

The estimated value for all items being requested to donate to Bosaso, Somalia is \$5000.00

Thank you.
