A. Certificate of Appropriateness.

Action: The Heritage Preservation Commission **approved** the certificate of appropriateness to allow the demolition of two buildings in the Saint Anthony Falls Historic District, subject to the following conditions:

1. As mitigation for the demolition of the Saint Anthony Commercial Club building, a photographic recordation of the property shall be prepared and submitted to staff that is in accordance with the guidelines of the Minnesota Historic Property Record.
2. The developer will make the commercial club building widely available (through a website or other means) for a period of six months to allow the options of relocation for reuse to be explored.
3. By ordinance, approvals are valid for a period of two years from the date of the decision unless required permits are obtained and the action approved is substantially begun and proceeds in a continuous basis toward completion. Upon

written request and for good cause, the planning director may grant up to a one year extension if the request is made in writing no later than May 3, 2018.

B. Certificate of Appropriateness.

Action: Notwithstanding staff findings, the Heritage Preservation Commission **denied** the certificate of appropriateness to allow a new 40-story building, based on the following findings:

1. The building would not be compatible with the adopted guidelines.
2. The scale and height is not consistent with the guidelines.
3. The building is not compatible with the historic district.
4. The setbacks to the adjacent contributing property are deficient.
5. A taller building detracts from the historic structures.
6. Impact to natural environment also needs to be considered e.g. Mississippi River flyway for birds.
