

Interim Online Permitting System Payment Form

Starting Monday, September 15, 2014, the City will begin using an Interim Online Permitting System while its existing system is replaced by a new, improved system.

To make payments during this interim period, customers can fax their credit card information to the City by completing this payment form.

By completing this payment form, you are approving the City to store your credit card information to apply towards future permit purchases. All credit card information will be stored and secured according to [Payment Card Industry Standards](#).

Customers with a valid email address on account will receive an email notification that their permit has been approved within one business day after application. If your permit application is not approved, your credit card will not be charged and a City staff member will contact you to review why your permit application was not approved.

I agree to participate in the Interim Online Permitting System and to allow the City of Minneapolis Development Services Customer Service Center to use the credit card information below until the new online permitting system becomes available.
