

State of Co-ops in Minneapolis

CO-OP TECHNICAL ASSISTANCE PROGRAM

A program of:
BUSINESS TECHNICAL ASSISTANCE PROGRAM
Supporting Business Growth in the City of Minneapolis

How many co-ops are in Minneapolis?

What different types of co-ops exist? What industries do they support?

What resources are available to support co-op development?

These and more questions will be addressed in our State of Co-ops in Minneapolis presentation, hosted by the new Co-op Technical Assistance Program (C-TAP) of the City of Minneapolis. During this event, the City present a co-op inventory conducted recently to show the many co-ops in Minneapolis, what their characteristics are, as well as opportunities and barriers they experienced during their creation. C-TAP will be introduced as a new resource to current co-ops and those interested in developing new co-ops.
