

HEALTH

MISSION

The Minneapolis Health Department improves the quality of life for all people in the city by protecting the environment, preventing disease and injury, promoting healthy behaviors, and creating a city that is a healthy place to live, work, and play.

BUSINESS LINES

A. Promote health: healthy residents, communities, and environments

A major responsibility of a local public health agency is health promotion. In Minneapolis, we believe that community engagement and partnerships are critical to success in this area. We seek out representatives of diverse communities to elicit their unique perspectives and build on their strengths to improve community health. We involve families, youth, and seniors in decisions that affect their well-being. Special projects target key phases across the lifespan. For example: A long-term partnership with area clinics and social service agencies aims to improve the health of babies and mothers by promoting early entry into prenatal care and providing targeted health education and care coordination services up to two years after the baby's birth. Other programs aim to reduce youth violence and promote healthy development and support for out-of-school time activities to youth and assistance to parents of teens. School-based clinics provide nutritional counseling, mental health and reproductive health services to high school students. A senior center reduces social isolation and engages older residents in activities that promote and maintain health.

B. Address factors affecting health: social conditions and physical environment

Individual health is highly dependent on the environments in which individuals live and work, and this is most apparent in urban environments, where population density and mobility are higher and poverty is more concentrated. To promote healthy weight through easier access to physical activity options and more nutritious foods, we work with City departments, schools, child care centers, and worksites to create healthier environments through policy changes. We also support place-based interventions, such as the Allina Backyard Initiative and the Northside Achievement Zone which aim to create broad collaborations to institute change at multiple levels to address a variety of goals simultaneously.

C. Protect the Public's health: disease prevention and control and emergency preparedness

Preventing and controlling infectious diseases is vital to community health. Pandemic influenza is an example of a situation that requires combined expertise in infectious disease control and emergency preparedness. We address our responsibilities through partnerships with Hennepin County, community clinics, and other community agencies. We identify populations at highest risk of specific diseases, such as sexually transmitted infections, and work with knowledgeable community members to develop targeted strategies that meet the unique needs of

specific groups. As an urban public health agency, we focus on populations that require messages and intervention tailored to their particular needs, whether due to language differences, cultural norms, social isolation, or history of traumatic experiences.

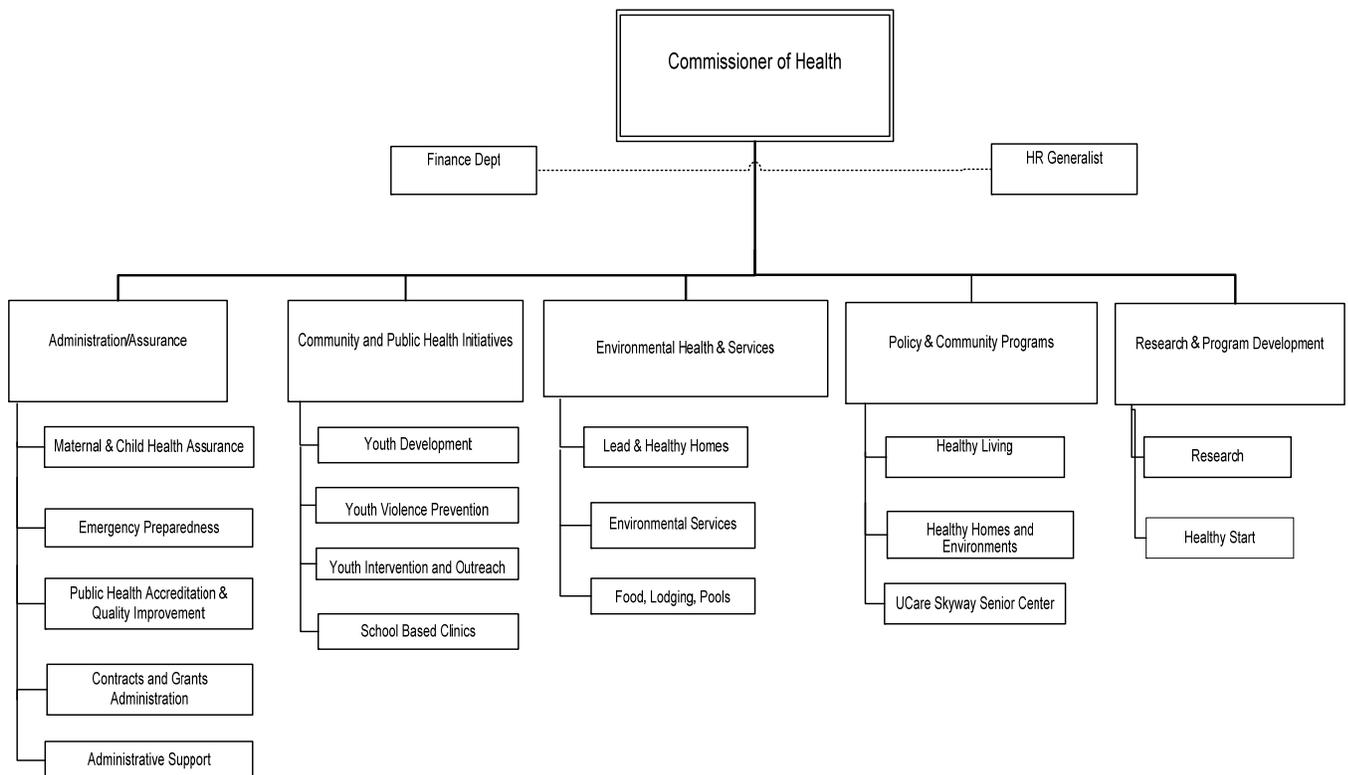

D. Protecting the Environment: food safety, physical environment, healthy homes

Food Lodging and Pools ensures commercial and institutional food offerings are safe and in compliance with state and local health codes by conducting more than 7,000 inspections a year of restaurants, schools, board and lodging facilities, hotels, pools, tanning and body arts establishments, daycares, farmers markets, groceries, and food vendors.

Environmental Services protects our air, water and land from pollutants and toxins by enforcing state and local environmental laws, providing technical assistance and operating the state well monitoring program as delegated by the Minnesota Department of Health.

Lead Hazard Control responds when children are lead poisoned. Response includes testing properties and ordering the removal of lead hazards. Through two separate multimillion dollar federal grants, the program proactively addresses lead and healthy homes issues in additional residential properties. We also work with community agencies to promote lead- and smoke-free homes and ensure physical safety for infants and toddlers in their homes and in child care.

ORGANIZATION CHART

Many People, One Minneapolis

Youth Development and Teen Pregnancy Prevention

General Fund: \$355,667
Other Funds: \$1,039,499

The Youth Development and Teen Pregnancy Prevention program has four primary components: ensuring that policy and programs for youth are aligned with positive youth development theory and are evidence-based; creating and maintaining collaborative partnerships; addressing disparities in youth development and teen pregnancy through program development, and managing contracts related to the above.

Senior Services

General Fund: \$70,000
Other Funds: \$174,800

Department senior services include two areas of activities - the UCare Skyway Senior Center and public health nurse home visits to low income, at-risk, and under/uninsured seniors. Since 2001 the Department has ensured home health services to eligible Minneapolis seniors under contract with the Minnesota Visiting Nurse Agency (MVNA). A total of \$70,000 annually is provided for home health care/therapeutic services for seniors considered high-risk, low income, age 60 and over (not yet eligible for Medicare), and who reside in Minneapolis. These services help maintain these high-risk seniors safely in their own homes.

Perinatal, Early Childhood and Family Health

General Fund: \$481,930
Other Funds: \$2,551,690

This program promotes maternal, paternal, infant and child health through a range of coordinated and complementary services.

School Based Clinic Program

General Fund: \$226,420
Other Funds: \$2,456,727

The Department operates School Based Clinics (SBC) in six Minneapolis public high schools and the Broadway Teen Parent Program alternative school at Longfellow. All clinic services are provided by medical and behavioral health professionals, focus on adolescent health services including acute illness care, well-teen exams, reproductive care, nutrition education, immunizations, and mental health screenings, diagnostic assessments and therapy.

Youth Violence Prevention - Parents of Adolescent Support Groups

General Fund: \$150,000

To support the citywide effort to prevent youth violence, the Minneapolis Health Department has invested in efforts to provide support, education and skill building opportunities to parents of teens. This initiative will be implemented by community based organizations that have experience working with families and adolescents from diverse racial and ethnic backgrounds. Agencies will be encouraged to use evidence based and or promising practices in parenting that address family values and childrearing using a culturally specific lens. Programs will also address the impact of historical trauma and racism and will provide parents with the tools that

they need to help them and their children. The program hopes to fund 3-6 projects ranging from \$40,000 – \$65,000 annual budgets and serving 60-120 families.

Air Quality: A Neighborhood Approach

General Fund: \$125,000

The department is requesting a one-time allocation to support air quality testing in 2014. The *Air Quality in Minneapolis: A Neighborhood Approach* project will expand on the *Minneapolis Air Quality Study* published in 2007, which provided a more extensive look at air quality in Minneapolis. The first half of this study was initiated in 2013. The study requires funding through 2014 to be completed. The project will to utilize a cost effective way to evaluate air quality where people live, work and play. The study is part of a larger focus on air quality that involves the Minnesota Pollution Control Agency, Environmental Initiative, Minnesota Technical Assistance Program, community associations, business associations, and others to focus on area source pollution reduction and improving our local air quality.

A Safe Place to Call Home

Youth Violence Prevention

General Fund: \$121,786
Other Funds: \$478,666

The Department provides city-wide leadership and coordination for implementing the Youth Violence Prevention Blueprint for Action in partnership with other government and community partners. Adopted by the Mayor and City Council in 2008, the Blueprint outlines four major goals: connecting youth to trusted adults; intervening at the first sign of risk; restoring youth that have gone down the wrong path; and unlearning the culture of violence. The Blueprint uses the public health approach and positive youth development theory as its framework for developing policy and program initiatives.

Lead Poisoning and Healthy Homes

General Fund: \$289,156
Other Funds: \$1,520,763

The Lead Poisoning Prevention and Healthy Homes (LPP&HH) initiative is aimed at eliminating elevated lead levels in Minneapolis for children under six and reducing indoor environmental hazards.

The Department accomplishes its objectives by securing contractual agreements with community agencies that perform outreach services, education, in-home visiting and referrals to remediation services.

Public Health Emergency Preparedness and Infectious Disease Prevention

General Fund: \$19,843
Other Funds: \$600,157

Local public health departments are required by statute (and by charter in Minneapolis) to assure the health and safety of Minneapolis residents and visitors from infectious disease. The Department does so through collaboration, contracts, and participation in a community-wide

continuum of care. That continuum includes: day-to-day prevention and intervention activities, responses to small events, and responses to a large public health emergency.

Food Lodging and Pools

General Fund: \$1,865,501

The Food Lodging and Pools program ensures commercial and institutional food offerings are safe and in compliance with state and local health codes by conducting more than 7,000 inspections a year of restaurants, schools, board and lodging facilities, hotels, pools, tanning and body arts establishments, daycares, farmers markets, groceries, and food vendors.

Preventing High-Risk Youth from Becoming Victims of Violence

General Fund: \$75,000

Work began in September 2012 to develop a retrospective study identifying those factors most predictive of youth being injured by violence. Phase I of the project was scheduled to be completed by the end of 2012 with phase 2 of the project being in 2013. While some data analysis has been done with police and school data, the department is still developing the infrastructure for data sharing amongst the various jurisdictions. The City has also received pro bono services from a private firm to assist with data analysis. This proposal supports the following one-time expense to complete work on developing a prospective predictive capability using the list of predictive indicators identified in the study.

Once the data system is developed and populated, programming for the identified youth will be developed. A final critical element will be resource development for programming in 2015. The robust data-driven components of this program should situate it well to compete for public and private grants. Additionally, Minneapolis Public Schools is also expected to develop complementary programs.

Eco-Focused

Environmental Services and Initiatives

General Fund: \$1,198,864

Environmental Services protects our air, water and land from pollutants and toxins by enforcing state and local environmental laws, providing technical assistance and operating the state well monitoring program as delegated by the Minnesota Department of Health. The Environmental Services program manages regulation of erosion control on construction sites, removal of underground storage tanks, sealing of wells, after hours work restrictions for construction, amplified sound permitting, permits to discharge to our storm and sanitary sewers, rock crushing permits, and base information on environmental site reviews. The Environmental Initiatives program is designed to proactively address pollution in a way that is a win-win-win for our area businesses, our residents, and the environment.

Livable Communities, Healthy Lives

Minneapolis Healthy Living Initiative

Other Funds: \$881,199

The 2014 Minneapolis Healthy Living initiative is a collection of projects aimed at decreasing obesity and tobacco use/exposure and the chronic disease they cause (e.g., diabetes, heart disease, asthma). The health department and its partners make long-term, sustainable changes to policies, practices and environments to create healthier environments where opportunities for healthy behaviors are easy. Because rates of obesity, tobacco use and related chronic diseases are associated with poverty, the health department's efforts are concentrated in Minneapolis communities with the highest proportions of people in poverty.

A City that Works

Public Health Core Infrastructure

General Fund: \$2,254,381

Other Funds: \$646,108

The core infrastructure program compiles and interprets health data and engages a broad network of residents and community-based agencies to identify and address health problems and their precursors. The program examines efforts across the country and internationally to identify successful methods for responding to priority health issues. The Department uses assessment data and research to develop and implement community-based policy and program changes.

FINANCIAL ANALYSIS

Expenditure

The total Minneapolis Health Department's budget increases from \$16.9 million to \$17.58 million from 2013 to 2014. This is an increase of \$652,000, or 3.9%.

Revenue

The department's total revenues in 2014 are projected to be \$12.8 million. This is a 3.6% increase from 2013, associated mainly with a 5.7% increase in Federal revenue.

Fund Allocation

This department is funded primarily by the General Fund with the remainder of the department's funding found in the State & Other funds and Federal Funds.

Mayor's Recommended Budget

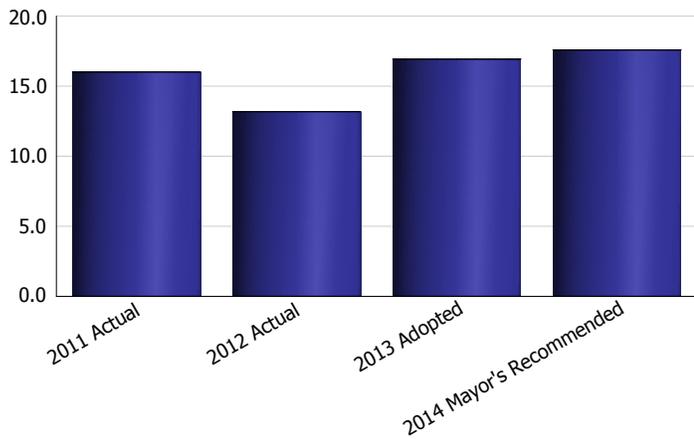

The Mayor recommended additional one-time General Fund allocations of \$150,000 for youth violence prevention, including a support group for parents of adolescent children, \$125,000 to continue the 2007 Minneapolis Air Quality Study, and \$75,000 in funding for additional programming to prevent violence amongst high-risk youth.
