

# Effective Emergency Response

## Effective Emergency Response

Effective emergency response begins with the actions taken in the initial minutes of an emergency which are critical.

A prompt warning to employees to evacuate, shelter or lockdown can save lives.

A call for help to public emergency services that provides full and accurate information will help the dispatcher send the right responders and equipment.

An employee trained to administer first aid or perform CPR can be lifesaving. Actions by employees with knowledge of building and process systems can help control a leak and minimize damage to the facility and the environment.
