

Mental Health Counseling Audio/Video Recording Release & Consent

It is our mission to provide effective, culturally competent and inspirational training and supervision to Minneapolis School Based Clinic (SBC) therapists and practicum students. One of the ways we believe this is possible is through the use of video and audio recording. This method allows for the direct feedback and supervision of the on-site supervisors and improves the quality of training the therapists and practicum students receive. Your permission is required to participate in this aspect of training and supervision.

Video and audio recordings are used exclusively in the ongoing development of supervisors and are shared only with licensed mental health professionals providing supervision and the SBC clinical supervisor. These recordings are the property of the SBC and are destroyed after they are no longer needed for the purposes stated above. You may revoke this consent at any time by providing a note of cancellation to the SBC Clinical Supervisor, Marie Capra.

I hereby give consent to audio and video record supervision sessions with my SBC designated supervisor. I understand this authorization is voluntary.
