

Fall Fiesta Maple
Acer saccharum 'Balista'

60'h x 50'w
Energy savings, fall color

This sugar maple is a popular choice because of its brilliant orange and red fall colors. Not only will you enjoy the colors of this tree but over time this tree will grow a dense canopy perfect for shading your home or yard on a hot summer day. Plant this tree on the east or west side of your property for maximum energy conservation.

Northern hackberry
Celtis occidentalis

40-60'h x 30-50'w
Shade tree, wildlife

A large, native tree, perfect for a tough space in need of shade! Interesting corky bark appears as the tree matures. This tree produces a small fruit enjoyed by many types of wildlife. Tolerant of a wide range of soil conditions and does best in full sun. For maximum energy conservation, plant this excellent shade tree on the west or east side of your property.

Ironwood
Ostrya virginiana

30'h x 25'w
Showy, Shade tolerant

Handsome medium sized tree perfect for Minneapolis yards. This shade tolerant species has interesting bark characteristics. Hop-like fruit emerge in late summer and persist throughout the winter. This graceful tree has horizontal branching which evolves into a rounded shade when mature.

London Planetree 'Bloodgood'
Platanus x acerfolia 'Bloodgood'

50'h x 40'w
Shade, ornamental

Be brave and give this zone 5 tree a chance. The dappled shade of this regal beauty will shine onto what this tree is most famous for: creamy yellow and tan multicolored bark. Shade and ornamental quality don't always go together except when talking about this urban avenger.

'Majestic Skies' Pin Oak
Quercus ellipsoidalis 'Majestic Skies'

50-60'h x 40-50'w
Wildlife, energy Savings, fall color
Full Sun to partial shade

A large native tree that over time will provide unparalleled energy savings and wildlife value. This stately tree has a pyramidal form and if grown in full sunlight it will be straight as a flagpole. The dark green leaves turn to a lively red in the fall and hang on all through the winter providing a beautiful contrast to the white snow. Plant this tree on the east or west side of your property for maximum energy savings.

Japanese Tree Lilac
Syringa reticulata
15-20'h x 15'w

When the purple lilacs fade away, this one is just starting to shine. This single stem tree has bunches of creamy white flowers that develop in late spring to early summer. Another attractive quality of this tree is its shiny dark red bark. The Japanese Tree Lilac prefers full sun and grown in the right conditions will need little maintenance.
