

Northern Metals Advisory Council  
July 26, 2018  
4:30 to 6:30  
Location TBD

At the first meeting of the Northern Metals Advisory Council we planned our next meeting to focus on BOTH asthma triggers and lead. However, after considering how much information there is to cover about each, we determined that it is best to FOCUS on one of these health mitigation objectives at a time. The July 26 meeting will focus on Lead poisoning intervention and prevention.

Agenda

1. Welcome and Orientation
2. Presentation on The History and State of Lead Poisoning Intervention and Prevention in Minneapolis. Lisa Smestad – Minneapolis Health Department
3. Sustainable Resource Center to discuss their Leadie Eddie mobile lead screening van as a resource for block to block community outreach and exposure assessment.
4. Northside Neighborhood Hub to discuss their block by block community outreach approach as a resource to consider.
5. Hennepin County will discuss their lead hazard control grant and results to date.
6. A resident in North or Northeast Minneapolis will be invited to speak and share their personal story about navigating the resources for lead intervention in their home.
7. Community Discussion
8. Consideration of any possible decisions or proposals for consideration that Advisory Council members would like to make at this time.
9. Close

**Meeting will be Facilitated by Sam Grant and James Trice  
The Public Policy Project.**
