June 3, 2015

Dear Stakeholders:

The final striping and seal coating for the roadway is planned for the week of June 8.

This process is a moving operation, and traffic is maintained during the process. Streets will be posted "No Parking" in advance of the work, and the street will be swept before the seal coat operation. "Loose Gravel" signs will be placed at the start of all seal coat locations, and at all street and trail crossings. Flaggers are used to direct traffic during the placement operation. Please expect additional travel time when travelling through the work areas.

* Due to the loose stone chips, bicyclists and pedestrians need to be extra cautious when traveling affected areas. Seal coated streets and parkways will remain open, although bicyclists and pedestrians are encouraged to use alternative routes. If you must travel on these streets, please use extreme care and caution.

Thank you for your patience during construction. We hope you are enjoying the refreshed look of the corridor.

For information regarding seal coating, you can visit a fact sheet online at:
