

Hennepin Avenue South Reconstruction (Lake Street West-36th Street West)

Project Overview

The City of Minneapolis proposes to reconstruct Hennepin Avenue South between Lake Street West and 36th Street West.

The proposed 0.75-mile long project is scheduled to occur over the course of the 2018 construction season and will consist of improvements to the roadway, sidewalk, and utilities. The scope of the project will encompass the entire right-of-way and include full removal of the existing street, subgrade correction, new pavement, curb and gutter, driveways, curb extensions, sidewalk as needed, utility work as needed, pavement markings, signals, and signage. The project will also include streetscape improvements including trees planted in the boulevard and pedestrian-level lighting.

The reconstruction project is also an opportunity to better design the street for current and future users. Using both planning and policy guidance and considering feedback from the community, Public Works has developed a recommended layout for the street. The recommended layout for the two project segments (Lake Street to 31st Street and 31st Street to 36th Street) can be found on the following page. As of April 2017, the recommended layout is pending City Council approval.

Schedule

- Jan-April 2017: Preliminary planning & project development
- June 2017: Seek City Council approval for recommended layout
- Summer-Fall 2017: Detailed design & engineering
- 2018: Construction
