Instructions for Completing Stormwater Quantity Credit Application

Print legibly in ink or type. Please read instructions before completing.

I. Mailing address and property information:

Provide the name, address, telephone number and email address of the property owner. Include the property address and Property Identification Number (PIN), which can be found on the City's property information Web site. Go to: www.ci.minneapolis.mn.us and click on "property information" and follow the instructions to search the site. The Property ID is the same as the PIN.

II. Water Quantity Credit

Properties can apply for either the "Standard Quantity Reduction Credit" or the "Additional Quantity Reduction Credit."

Standard Quantity Reduction Credit. The Standard Quantity Reduction Credit is a 50 percent credit on a property's stormwater fee. The "Standard Quantity" credit is based on a property's stormwater quantity management tools/practices being able to retain the *10-year, 24-hour type II SCS* storm event. To qualify for this credit, the property owner must demonstrate that all stormwater from the property is controlled with an on-site stormwater quantity management tool or practice (BMP). Any natural topographic features incorporated as stormwater tools must be on land wholly owned by or leased to the applicant or applicants and are required to meet the same standards for performance and maintenance as constructed BMPs.

Additional Quantity Reduction Credit. The Additional Quantity Reduction Credit is a 100 percent credit on a property's stormwater fee. To be eligible for the "Additional Quantity" credit, a property's stormwater quantity management tools/practices must be able to retain the *100-year, 24-hour type II SCS* storm event. To qualify for this credit, the property owner must demonstrate that all stormwater from the property is controlled with an on-site stormwater quantity management tool or practice (BMP). Any natural topographic features incorporated as stormwater tools must be on land wholly owned by or leased to the applicant or applicants and are required to meet the same standards for performance and maintenance as constructed BMPs.

III. Professional Certification

To apply for a stormwater credit, this application must be certified by a state licensed engineer or landscape architect. Only those properties that can demonstrate the capacity to handle a 10-year or 100-year rain event can receive a stormwater quantity credit.

Your application will not be processed if this section is not signed and dated by the property owner or their designee.

IV. Ratepayer Certification.

This section shows that as the owner or representative of the owner, you give the City permission to enter this property for the sole purpose of conducting a site inspection of the stormwater management facilities/methods on this property. Your application will not be processed if this section is not signed and dated by the property owner or their designee.
