

Current Parking Capacity in the 38th Street East Project Area

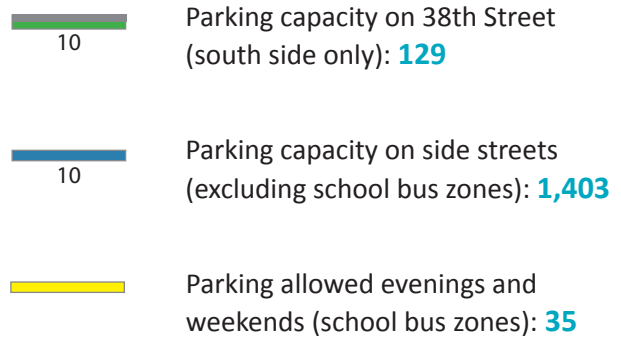

Each number represents the total parking spaces per block. Map not drawn to scale.

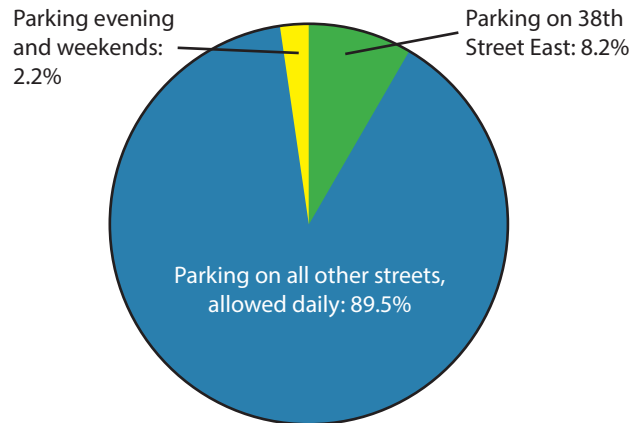

Parking Near 38th Street East

As part of the 38th Street East Bike Lanes Project, Public Works measured the total capacity of on-street parking within the project area. This parking capacity includes all streets within this area, was measured for 1 standard block (about 600 feet) north and south of 38th Street, but does not include any parking spots on 37th or 39th Streets.

- A parallel parking space is assumed to be 22 feet long in this analysis, which is a standard assumption that allows for vehicle space and the ability to maneuver into the space.
- Blocks vary in parking capacity due to alleys entrances, driveways, and bus stops. Public Works measured the space of all of these factors to determine block by block parking capacity on all streets.
- Parking is currently prohibited on the north side of 38th Street East.
- Parking Capacity on Edmund Boulevard and Dowling Street are halved because street widths are narrow enough that parking is only practical on one side.

Total capacity of all blocks measured: **1,567**

Current Parking Capacity Near the 38th Street East and 42nd Avenue South Business Node

- █ 10 Parking capacity on 38th Street (south side only): **29**
- █ 10 Parking capacity on side streets (excluding school bus zones): **265**
- █ 10 Off-street parking lot spaces: **37**
- █ Parking allowed evenings and weekends (school bus zones): **12**
- █ Metro Transit bus stop - no parking allowed

Each number represents the parking spaces for that block or lot. Streets, bus stops, and parking lots are not drawn to scale.

*Parking lot capacity is based on evening hour availability for each lot

Parking Near the 38th Street East and 42nd Avenue South Business Node

As part of the 38th Street East Bike Lanes Project, Public Works measured the total capacity of parking near the 42nd Avenue South business node. This parking capacity includes 38th Street, off-street parking lots at the node, 41st, 42nd, and 43rd Avenues for 1 block in each direction, but does not include any parking spots on 37th or 39th Streets.

- A parallel parking space is assumed to be 22 feet long in this analysis, which is a standard assumption that allows for vehicle space and the ability to maneuver into the space.
- Blocks vary in parking capacity due to alley entrances, driveways, and bus stops. Public Works measured the space of all of these factors to determine block by block parking capacity on all streets.
- Parking is currently prohibited on the north side of 38th Street East.

Percentage of Current Parking by Category

Total capacity of all blocks measured: **343**
