Subject: Industrial Boulevard shared use trail

Industrial Boulevard shared use trail

The Pedestrian Advisory Committee enthusiastically supports the lane removal and width reduction of travel lanes on this project. We support the plan to create a green barrier with the addition of trees on the boulevard. We also support the refuge island at the Godward St NE crossing, with the request that physical barriers be part of that island to ensure pedestrian safety. Finally, we request that there be further examination of the possibility to fill any existing sidewalk gaps on or adjacent to this project, including the gap to the south of the Wendy's.
