Join us to celebrate
Global Accessibility Awareness Day (GAAD)

May 18, 2023

Digital inclusion: It's an ongoing journey toward accessibility.

Making key changes to your website and the digital services that you offer can create a better experience for everyone. We call this digital accessibility.

Join our session to learn how the City of Minneapolis and Hennepin County are creating a more positive, inclusive digital experience for all.

Register online

In our session, you'll learn:
- How we're making our organization's digital experience more accessible.
- How to make digital content accessible for all the ways that people think and those who've experienced trauma.
- Resources to help people learn how to use technology and the internet.
- Assistive technology and help offered at Hennepin County Libraries.
- Ways to work with others to make things more accessible for everyone.

We encourage government employees to attend. This free event is open for anyone to attend.

May 18, 2023
11:00 a.m. – 12:00 p.m. CDT

Virtual
Online via Microsoft Teams

Everyone has a part in making the digital experience accessible to all. When you make your digital content accessible, you:
- Remove barriers.
- Use inclusive practices.
- Build a more accepting online community.
