

Safety Improvements Coming Soon Near You!

Minneapolis Public Works will install traffic calming islands in your neighborhood later this year. Traffic calming islands are raised areas located mid-block or at intersections. They help to reduce vehicle speeds and improve crossing safety.

The locations for these installations include:

- **28th Ave S** at 45th St E
- **28th St E** at 34th Ave S and 37th Ave S
- **42nd Ave S** at 32nd St E and 33rd St E
- **2nd St SE** at 3rd Ave SE

Locations were selected independently from the Neighborhood Traffic Calming program on streets that are typically ineligible.
