PHS-10	Public Health and Community Services Public Health Planning, Policy Development and Advocacy Section Overview The records in this section of the schedule document the management activities associated with Public Health Planning, Policy and Advocacy. The records also document the advocacy activities associated with working with elected officials, community members and other partners to identify emerging issues, promote public health and address disparities. Policy activities include the creation and maintenance of policy and the development of strategies to promote public health.								
PHS-10-02	Public Health and Community Services Public Health Planning, Policy Development and Advocacy Department Business Plans/Strategic Planning Final five year and annual business plans as provided to the Mayor, City Coordinator and approved by Council. Records may include: Five Year Plan, Annual Business Plan	BUS120	PERM	PERM	PERM	MAX3	DEPARTMENT	PUBLIC	
PHS-10-04	Public Health and Community Services Public Health Planning, Policy Development and Advocacy Department Performance Management The activities involved in managing the performance of the department against the department plans. Activities include developing performance indicators and measurement mechanisms; measuring, monitoring and analyzing performance; conducting reviews of performance and responding to results; and reporting on department performance to internal and external stakeholders.	USE SERIES CODE ADM-30-05							Use the Administrative Schedule - City Governance and Administration (ADM-30-05) to determine retention for Department Performance Management Records.
PHS-10-06	Public Health and Community Services Public Health Planning, Policy Development and Advocacy Department Annual Report* The records in this series summarize the annual activity of the department. Information contained in the series may include goals and objectives, fiscal status, project work performed, accomplishments, staff changes, etc.	USE SERIES ADM-30-04							Use the Administrative Schedule - City Governance and Administration (ADM-30-04) to determine retention for Department Annual Reports.

	<p>federal and state regulations. Some research projects require review and approval by one or more Institutional Review Boards (IRB) for the Protection of Human Subjects. The records in this series will include IRB applications and all subsequent correspondence and reports to and from the IRB(s). IRB applications include study protocols, any questionnaires or data collection instruments used in the study, information sheets for prospective human subjects, and consent forms for adult subjects and parents/guardians of minor subjects, and assent forms for minor subjects.</p> <p>Note: Institutional Review Board records related to specific projects are often maintained with the project file that they relate to. Separation of IRB records related to specific projects is recommended to help ensure availability for future reference and use.</p>								
PHS-20-04	<p>Public Health and Community Services Research and Assessment</p> <p>Informed Consent/Assent Records - Completed Forms Whenever a signed consent is required, a completed informed consent/assent record must be signed to document the consent/assent of persons who participate in research. The completed forms may contain personally identifiable information, including signatures and will be project specific.</p> <p>If consent is required, a sample copy of the consent form will be included as part of PHS-20-02 - Research Requirements and Approvals (IRB Application).</p> <p>Note: When possible, informed consent records should be maintained separately from other research and assessment records related to specific projects.</p> <p>Records may include: Completed informed consent/assent forms, informed consent checklist, related information provided to participant</p>	HLTH08	ACT+6	ACT+6	ACT+6	MAX3	RESEARCH	PRIVATE MS13.384 MS13.3805 MS13.46	Active ceases after receipt of signature.

PHS-20-06	<p>Public Health and Community Services Research and Assessment Primary Health Data - Data Collection</p> <p>The purpose of this series is to manage the data source of data that is collected and most often entered to a database for research and assessment purposes. Source data may come from completed forms, may be imported, may be directly entered as summarized information, etc. The data collected may contain personally identifiable information. The data may be collected for a variety of purposes including for the support of projects, programs, initiatives, collaborations, to meet reporting requirements and/or to provide information for incorporation into a formal report, etc.</p> <p>Records may include: Input forms, surveys, questionnaires, chart audit forms</p>	HLTH15	5	5	5	MAX1	RESEARCH	PRIVATE MS13.384 MS13.3805 MS13.46	Retention begins after the content is entered/or imported into a trustworthy database and the source data is verified.
PHS-20-08	<p>Public Health and Community Services Research and Assessment Primary Health Data - Electronic Files</p> <p>Primary health data in electronic form is created by entering information from completed data collection forms, via direct entry or may come from other data sources. The electronic data is primarily used to monitor the health of the population in general and may also be used to help determine whether interventions are effective. The data may be used to substantiate and support research findings and provide information to help direct the future conduct of public health initiatives. Primary health data may also provide value for secondary evaluations.</p>	HLTH18	ACT+6	ACT+6	ACT+6	MAX3	RESEARCH	PRIVATE MS13.384 MS13.3805 MS13.46	Active ceases after the program ends, completion of the project, creation of the final report, and/or financial audit is complete - whichever applies or occurs later.
PHS-20-10	<p>Public Health and Community Services Research and Assessment Research Data Sets - Personal Identifiers Removed</p> <p>Research and Assessment may link data sets for the purpose of appending one set of individual-level variables to another. Once the data sets are linked, unique personal identifiers (e.g., name, address, phone number, medical record number) are removed and cases are enumerated by sequential case numbers. Research and Assessment "delinks" the unique personal identifiers as a means to assure respondents that uniquely identifying information will not be retained in the data set.</p>	HLTH17	IND	IND	IND	MAX3	RESEARCH	PRIVATE MS13.384 MS13.3805 MS13.46	Review after ten years. Migrate electronic files to latest programs every two years.

			LEGAL	USER	TOTAL				
	<p>When determining how to apply retention or when to begin retention, the following cases should be considered:</p> <p>a) In some cases, the case number will also be recorded on a signed consent form, a hard copy document which will have to be retained for a given time period. When individuals provide signed consent, Research and Assessment must provide respondents with a copy of their survey responses if requested - therefore, some linkage is required.</p> <p>b) In some cases, the case number may not be recorded elsewhere. For example, if Research and Assessment (or a subcontractor) purchase a list of household telephone numbers and addresses for purposes of conducting a survey, they may not obtain signed consent. The consent may be verbal (in a telephone interview) or implied (by returning a mailed questionnaire). Therefore, there will be no uniquely identifying information in the survey data set. Similarly, if Research and Assessment append birth records to project records on mother/infant participants, there would not necessarily be a record of unique identifying information once the linkage was made and these variables were removed from the new data set.</p> <p>c) A related situation applies to surveys conducted via the web or e-mail. A respondent's e-mail address is available but may not be retained in the survey data set to protect confidentiality.</p>								
PHS-20-12	<p>Public Health and Community Services Research and Assessment Secondary Health Data - Electronic Files</p> <p>This series is made up of sets of electronic data that the Minneapolis Health and Family Support Department receives from others. The data is used for a purpose other than the original purpose. Generally speaking, MHFS uses secondary data to analyze and monitor the health of the population in general, prevent/control injury or control disease. Secondary data may also be used to produce research briefs, research reports or to assist in the evaluation of programs. Secondary data comes from a variety of sources including the federal government, Minnesota Department of Health and from Hennepin County.</p> <p>Records may include: Vital Records, Sexually Transmitted</p>	HLTH18	ACT+6	ACT+6	ACT+6	MAX3	RESEARCH	PRIVATE/CONFIDENTIAL MS13.384 MS13.3805 MS13.46 MS144.225	Active ceases after need for data ends, completion of the project or creation of a final report which utilizes the data - whichever applies or occurs later.

	<p>Infections Database, MN Student survey, MDH Insurance data, MN Lead Data, SHAPE data</p> <p>PHS-20-14 Public Health and Community Services Research and Assessment Secondary Health Data - Archived Data Reports Secondary Data Reports is made up of older secondary data that has been output to printed reports. The older secondary data may no longer be applicable and some of the data may be able to be recreated by contacting the original source/steward of the data.</p> <p>Records may include: Census records, birth records, death records, communicable disease records</p>	HLTH18	ACT+6	ACT+6	ACT+6	MAX3	RESEARCH	PRIVATE CONFIDENTIAL MS13.384 MS13.3805 MS13.46 MS144.225	Active ceases after need for data ends, completion of the project or creation of a final report which utilizes the data - whichever applies or occurs later.
	<p>PHS-20-16 Public Health and Community Services Research and Assessment Statistical Analysis Syntax File The purpose of the series is to document the algorithms that define how data is analyzed. Using SPSS and SAS syntax, selected datasets can be defined, manipulated, analyzed, saved and may be output for reporting purposes.</p> <p>Records may include: SPSS syntax file, SAS syntax file, Output files</p>	HLTH06	10	10	10	MAX3	RESEARCH	PUBLIC	
	<p>PHS-20-18 Public Health and Community Services Research and Assessment Data Reports Generally speaking, research data reports are interim reports or reports that are ad-hoc in nature and are created to answer a single question or to respond to an inquiry. The reports are informal, not disseminated and used for preliminary data analysis. The reports may be later incorporated into a final/formal report. This series documents the data output reports that are generated for statistical analysis on a variety of topics. The reports are generated from data in a database that are created during analysis and reporting activities.</p> <p>Copies of the research data reports may also be found in the grant, contract or program manager project files.</p>	HLTH15	5	5	5	MAX1	RESEARCH	PUBLIC

PHS-30	<p>Public Health and Community Services Grant and Contract Management Section Overview</p> <p>The records in this section of the schedule address the records associated with the seeking/securing of grant funds and the records associated with the process of granting of contracts to others. The section also documents records associated with managing contracts and associated compliance monitoring/reporting. The section also addresses records associated with the Contract Manager file if records are maintained as one unit (PHS-30-18).</p> <p>The section contains series that document the seeking and securing of funds and span the activities related to proposal development, the application process and the acceptance of funds by the City/department. The series also document the management of the revenue contract (most often a grant or gift) including the activities related to reporting for compliance.</p> <p>The section also contains series that describe and identify the retention of records associated with the granting/distribution of funds (payable contracts) to others and the management of the contracts and associated monitoring, compliance and reporting of contract progress and deliverables.</p> <p>Use PHS-40 Projects, Initiatives and Collaborations or PHS-60 Direct Services Programs for the records associated with the administration/management of projects, initiatives, collaborations and programs.</p> <p>SPECIAL NOTE: Federal guidelines recommend that financial records, supporting documents, statistical records and other records pertinent to grant programs be retained for three years. This schedule requires that most grant records be retained for 6 years after project completion. The retention period starts from the date of submission of the final expenditure report or, for grants that are renewed annually, from the date of submission of the annual financial status report, with the following qualifications and exceptions:</p> <ol style="list-style-type: none"> 1. If litigation or audit is begun before the expiration of the retention period, the records shall be retained until all litigation or audit findings have been resolved. 2. Records for non-expendable property acquired with grant funds

	information, patient contact data, nurses notes, medications, physicians ' orders and notes								
PHS-50-06	Public Health and Community Services Program Medical Records Case Files - Visiting Nurse/Home Health Care	HLTH03 HLTH04	ACT+6	ACT+6	ACT+6	MAX3	AGENCY or DEPARTMENT	PRIVATE MS13.384 MS13.3805 MS13.46	Active ceases at the end of the year of the last date of service or at the end of the year that a patient reaches the age of majority (18 years) - whichever occurs later.
	The Home Health Care Case files contain forms and documentation that identify names, addresses and patient/code numbers to identify each case. The records may contain information about the family, referral source, nursing assessment, plan of care, medical orders, nursing notes, pertinent financial data, billing forms, home health aide assignment sheets/notes of service, reports of visits to referral, etc.								
	Note: If several family members are located in the same file, retention is based upon age of youngest family member.								
PHS-50-08	Public Health and Community Services Program Medical Records Case Files - Medical Component - General*	HLTH03 HLTH04	ACT+6	ACT+6	ACT+6	MAX3	CLINIC, AGENCY OR DEPARTMENT	PRIVATE MS13.384 MS13.3805 MS13.46 MS144.335	Active ceases at the end of the year of the last date of service or at the end of the year that a patient reaches the age of majority (18 years) - whichever occurs later.
	The purpose of this series is to manage program case records (that contain patient information) that are not identified elsewhere in the schedule. The records in the series include information regarding a client or patient. The records are identified by a client/patient/family name or client/patient number. Records can include referrals, nursing narrative describing/documenting the services provided, baseline data, demographics, immigrant cards, applications, release forms, requests for services, plan of care, pertinent financial data, billing forms, etc.								
	An example of programs case file that contain a medical component are the case files created/maintained by the New Families Center.								
	Note: If several family members are located in the same file, recommendation is based upon age of youngest family member.

Records may include: hematology, microbiology, urinalysis, serology, immunology, ova and parasites, Pathway referrals, State referrals, GC/Chlamydia, water microbiology, ice milk testing, food testing								
PHS-62-04	Public Health and Community Services Public Health Laboratory Drug and Alcohol Testing	HLTH22	ACT+6	10	10	MAX1	LABORATORY	PRIVATE MS13.384 MS13.3805 MS13.46	
	Drug and alcohol analysis reports. Most samples for analysis are received from numerous drug task forces and police departments throughout the Metro area. Private parties can also request analysis. Records may include: Blood, urine, beverage alcohol analysis reports, Drug case records worksheets, Drug case records report								
PHS-62-08	Public Health and Community Services Public Health Laboratory Environmental Lead Testing Program/Testing Results*	HLTH21 ENV100	10	10	10	MAX3	LABORATORY	PUBLIC/PRIVATE MS13.384 MS13.3805 MS13.46	
	The records document the activities associated with the Environmental Lead Testing Program administered by the Public Health Laboratory. The records specifically document the performance and results of the analysis and reporting of lead content level testing. Lead content testing and analysis is provided for a number of agencies including Minneapolis Regulatory Services, Hennepin County and various other County Health Departments throughout the state and midwest region. Lead content level testing is performed on environmental samples that the Lab receives in the form of dust, paint, chips, solid and water. Analysis records are used as part of risk
