

Explanation of Procedure

The Minneapolis Health Department School Based Clinics Program keeps this record in your medical file (or your child's medical file). The information contained within this record is being maintained to monitor immunization needs in order to prevent disease. If personal information is requested and not provided, immunization services may be denied. This information is private and will not be shared with anyone except the Minnesota Department of Health; licensed health care professionals such as doctors, nurses, health insurers, Head Start programs, schools, county public health agencies, community action agencies, or licensed health care facilities such as hospitals in order to assess and/or provide immunization services or to facilitate future enrollment in a school, or college. Your immunization records will be given to Minnesota Immunization Information Connection (MIIC) a statewide registry, for this purpose. If you choose not to have this information included in the registry please let us know.

Vaccine Administration

Many vaccines require two (2), three (3), four (4), or five (5) doses to provide complete protection. These include **Td** (tetanus/diphtheria); **Tdap** (tetanus, diphtheria, acellular pertussis): **IPV** (injectable polio vaccine); **MMR** (measles, mumps, rubella); **Hep B** (hepatitis B vaccine); **MCV4** (meningococcal conjugate vaccine); **HPV** (human papillomavirus); **Hep A** (hepatitis A vaccine); **MenB** (meningococcal group B vaccine); **COVID** (coronavirus disease vaccine); **Varicella** (varicella (chickenpox) vaccine).
